OBJECTIVE

React & Full-Stack Developer with strong expertise in front-end and back-end development. Proficient in JavaScript, React.js, Node.js, Express.js, MongoDB, and Django, with hands-on experience building scalable web applications. Actively working with React Native to develop cross-platform mobile applications, leveraging shared React concepts such as components, hooks, and state management. Skilled in RESTful API integration, authentication systems, and cloud-based deployments using AWS services such as EC2 and S3, with a focus on clean, maintainable, and high-performance solutions.

INTERNSHIPS

CodeTech IT Solutions PVT.LTD – Hyderabad - 06/2025- 08/25

Front-end Web Developer :- As a Front-End Web Developer Intern at CodeTech IT Solutions Pvt. Ltd., I develop responsive web interfaces using HTML, CSS, JavaScript, and React.js. I use React hooks like useState for state management and collaborate with design and backend teams to integrate APIs. My work focuses on improving UI performance, fixing bugs, and ensuring cross-browser compatibility.

UNIFIED MENTOR – Gurugram, Haryana – 06/2025- 09/25

Full-Stack Web Developer :- As a Full Stack Web Developer Intern at Unified Mentor, I build and maintain web applications using React.js on the front end and Node.js/Express.js on the back end. I design RESTful APIs, manage MongoDB databases, and develop responsive UIs. I collaborate with teams to ensure seamless integration, optimize performance, and enhance user experience across the full stack.

EDUCATION

B.TECH- CSE , IIMT Engineering College (Affiliated to A.K.T.U)	2022-2026
12th , Taxsila Public School	2021-2022
10th , Taxsila Public School	2019-2020

CERTIFICATION

- Certificate of Completion, Web Development Workshop –Microsoft Learn Student Ambassador (Aadi Foundation)
- JavaScript (Intermediate) – HackerRank
- Certificate of Completion Front-end Web Development – N.S.D.C
- Solutions Architecture Job Simulation – Forage (aws)
- Amazon EBS Primer – AWS Training and Certification

PROJECTS

- **AI SaaS Platform (Web & React Native Mobile App):-**
Built an AI-powered SaaS platform offering content generation and image-processing tools. Developed the web app using React, Node.js, Express.js, and NeonDB with secure authentication and optimized APIs. Currently building a cross-platform mobile app using React Native, integrating existing APIs and implementing mobile-first UI and navigation.
- **Chat-App :-** I developed a real-time full-stack chat application using the MERN stack (MongoDB, Express.js, React, Node.js). The app allows users to register, log in, and chat instantly with others through secure WebSocket connections. It includes features like real-time messaging, authentication with JWT, and a responsive UI for a seamless chatting experience.
- **Smart Nearby Places Recommender** – Built a mood-based location recommendation web app using React, OpenStreetMap, and Overpass API. The application detects the user's live location, recommends nearby places, and displays real-time navigation routes using Leaflet Routing Machine. Deployed on Vercel with a responsive, animated UI.
- **Weather Information Site:-** Developed a web application that provides real-time weather updates by integrating third-party weather APIs. Designed and implemented a fully responsive user interface to ensure smooth performance and compatibility across various devices and screen sizes.
- **Personal Password Manager (Full-Stack) :-** Designed and developed a full-stack password manager with secure encryption to protect sensitive user data. Implemented authentication, database integration, and robust back-end features to ensure data integrity, reliability, and user privacy.

CLOUD COMPUTING (AWS)

- Worked with Amazon EC2 to launch and manage virtual servers for application hosting.
- Used Amazon S3 for object storage, file uploads, and static asset management.
- Created and managed EBS volume snapshots for backup and recovery.
- Performed application-level snapshots to ensure data consistency.
- Managed network snapshots and understood VPC-level networking concepts.
- Gained hands-on exposure to basic IAM roles and permissions for secure access.

RESEARCH and PUBLICATIONS

- ❖ **AI-Powered SaaS Platform for Image Editing and Content Processing**
 - *Authors:* Mayank Mathur, et al.
 - *Platform:* Zenodo (Preprint), 2026
 - DOI: <https://zenodo.org/records/18173472>
 - Designed and documented an AI-powered SaaS platform integrating image generation, background removal, object removal, and structured resume evaluation.
 - Implemented using the MERN stack with cloud-based AI inference and Neon serverless PostgreSQL for scalable data management.

SKILLS

- **Programming Languages** :- Python, JavaScript.

- **Web & Mobile Technologies** :- HTML5, CSS3, Tailwind CSS, React.js, React Native(Basics), Node.js,

Express.js, Django, MongoDB, API-Integration, Git & GitHub, Front-End

Frameworks.

- **Technical Tools** :- Postman, VS Code, Firebase, Netlify, Pycharm.

INTERESTS / MISCELLANEOUS

- **Interests** : Web Development, Mobile App Development, Cloud-Computing

- **Soft Skills** : Goal-Oriented, Perceptive Thinking, Strategic Leadership, Empathetic

- **Hobbies** : Music Listening, Travelling
